## Board of Director Profile

### **Rob Booth, P.Eng., M.Eng**

**Rob Booth** is a professional engineer with over 30 years of environmental engineering experience in the public and private sectors. He has a B.A.Sc. in Civil Engineering from Queens University, and a Master of Environmental Engineering from the University of Toronto. Rob's experience in various senior management positions at the vice president and director level and interest in promoting a sustainable society help guide My Sustainable Canada in its developmental stages and beyond.

While at Environment Canada, Rob championed the development of household hazardous waste and industrial waste reduction programs as well as the National Groundwater and Soil Remediation program.

Rob's technical expertise has been applied to projects such as municipal and private water and wastewater treatment systems, and the clean-up of major contaminated sites such as the Sydney Tar Ponds. His international work included technology transfer of environmental technologies and education programs, representing Canada at NATO/CCMS (Challenges for Communities of Modern Society) activities, and as a director of North American Environmental Services.

Rob has been an active citizens board member of the Hamilton Conservation Authority for the last seven years serving the on the Water and Environmental Impact Advisory Board and currently on the Conservation Areas Advisory Board.

Rob currently heads up his own consulting company but his career has also spurred an interest in building his own energy efficient and environmentally friendly home, which uses energy conservation and energy efficient designs and technologies as well as alternative energy sources. Rob is a certified energy advisor with an interest in promoting a zero carbon footprint. You can reach Rob at [RBooth@GTO.net](mailto:RBooth@GTO.net)
